NEXUS

Exploitation Plan

Project: Multi-Source AI Intelligence Convergence for Institutional Risk Assessment

Organisation: Polyxmedia Ltd

Project Period: August 2026 - January 2027

Exploitation Period: 5 years post-project completion

Programme: AI Champions: Frontier AI Phase 1

Innovate UK | Polyxmedia Ltd

1. Exploitation Objectives

The primary exploitation objective is commercial launch of NEXUS as a SaaS intelligence platform serving institutional risk assessment buyers in the UK and NATO-allied markets. Secondary objectives include establishing Polyxmedia Ltd as a recognised UK-sovereign AI intelligence provider, building a calibrated prediction track record as a competitive asset, and creating export revenue from Five Eyes and allied markets.

2. Target Markets and Customers

Three tiers of market entry, sequenced by readiness and sales cycle complexity:

TIER	TIMELINE	TARGET	APPROACH
Tier 1	Months 1-12 post-project	UK risk consultancies and corporate intelligence firms	Direct sales, converting pilot users to paying subscribers
Tier 2	Months 6-18	Corporate security departments in financial services, energy, critical infrastructure	Sector-specific outreach via conferences and partnerships
Tier 3	Months 12-36	Five Eyes and NATO-allied markets	Channel partnerships with established defence and security distributors

3. Revenue Model

Tiered SaaS subscriptions structured around user count and deployment complexity:

TIER	DESCRIPTION	ANNUAL PRICE
Analyst	Individual access	~£1,200
Operator	Team deployment (up to 10 users)	£5,000 - £15,000
Institution	Enterprise deployment, custom integrations	£25,000+

Revenue target: £1.275M cumulative within 5 years of project completion.

Year-by-Year Projection

YEAR	TARGET REVENUE	CUMULATIVE
Year 1	£25,000	£25,000
Year 2	£100,000	£125,000
Year 3	£250,000	£375,000
Year 4	£400,000	£775,000
Year 5	£500,000	£1,275,000

4. IP Exploitation Strategy

- Core convergence algorithms protected as trade secrets
- Patent protection pursued selectively where disclosure does not compromise competitive advantage
- Continuous calibration history (Brier score track record) creates non-replicable competitive asset
- All IP remains UK-owned by Polyxmedia Ltd
- Open-source components (Next.js, PostgreSQL, Drizzle ORM, Leaflet) used under permissive licences (MIT, Apache 2.0, BSD)
- Third-party data accessed via commercial API licences permitting analytical use and derivative insights

5. Scale-up Plan

TIMELINE	ACTIVITY	HEADCOUNT
Months 1-6 post-project	Convert pilot users, launch commercial subscriptions, hire BD lead	2 FTE
Months 6-12	Hire backend engineer + data engineer, expand to 10-15 paying customers	4 FTE
Months 12-24	Hire 1-2 domain analysts, enter Five Eyes markets via partnerships	5-6 FTE
Months 24-36	Assess follow-on funding if growth warrants, target 50+ customers	8-10 FTE

6. Project Spend Profile (Quarterly)

CATEGORY	Q1 (MONTHS 1-2)	Q2 (MONTHS 3-4)	Q3 (MONTHS 5-6)	TOTAL
Labour	£35,216	£35,216	£35,215	£105,647
Overheads (20%)	£7,043	£7,043	£7,043	£21,129
Materials	£20,000	£15,000	£10,000	£45,000
Travel	£1,000	£2,000	£5,000	£8,000
Other costs	£7,500	£3,500	£3,500	£14,500
Quarterly total	**£70,759**	**£62,759**	**£60,758**	**£194,276**
Grant claim (70%)	**£49,531**	**£43,931**	**£42,531**	**£135,993**

7. Dissemination Plan

- Published accuracy benchmarks from feasibility study (non-proprietary methodology only)
- Conference presentations at ASIS International, Intelligence and National Security Alliance events
- Engagement with DASA and KTN networks to raise awareness within UK defence-tech ecosystem
- Case studies developed with pilot user permission for marketing collateral
- Methodology papers submitted to relevant industry publications

8. Risks to Exploitation

RISK	LIKELIHOOD	IMPACT	MITIGATION
Slow institutional sales cycles	Medium	High	Start pipeline during feasibility study, pilot users as warm leads
US incumbent price cuts	Low	Medium	Compete on capability (convergence + accuracy tracking), not price
Key-person dependency	Medium	High	Hiring plan prioritises BD lead, reducing founder bottleneck
Regulatory changes to AI	Low	Medium	Platform built with transparency and auditability by design
Market does not value convergence over single-source	Medium	High	Feasibility study validates this before commercial investment

9. Review Schedule

Exploitation plan reviewed and updated every 6 months in line with Innovate UK requirements, with progress reported to Monitoring Service Provider at quarterly reviews.

REVIEW POINT	FOCUS
Month 3 (mid-project)	Pipeline development, pilot user recruitment progress
Month 6 (project end)	Pilot results, commercial validation, updated revenue projections
Month 12 post-project	First year commercial performance, hiring progress
Month 18 post-project	Export market entry assessment
Month 24 post-project	Scale-up funding decision

10. Project Setup Information

Project Location: Polyxmedia Ltd, 86-90 Paul Street, London, England, EC2A 4NE

Working Location: Guildford, Surrey (remote/hybrid)

Project Manager: Andre Figueira, Technical Director

Finance Contact: Andre Figueira

Collaboration Agreement: Not applicable (single participant project)
